2025/09/13 13:42 1/1 Audio Controlled Devices

## **Audio Controlled Devices**

The easiest (but not the cheapest) way to have Jennifer remotely control a device is to get an audio controlled estim such as:

http://store.e-stim.co.uk/index.php?main\_page=product\_info&cPath=23\_27&products\_id=2

Simply plug it into the headphone socket of your computer or phone (you may want to switch off notification sounds  $\bigcirc$ ) and select an e-stim controlled by audio in your options.

## A cheaper option?

Looking at How Audio Output Works It may also work to simply plug an amplifier between your laptop headphones and some e-stim pads?

Search ebay for "Audio Amp DC 9V" and you should be able to get one for under £4 - **Not tested** yet so please report back if you feel brave to try this out! If this works may be good for linking into Raspberry Pi projects?
