

```
Title:00_use_debug_mode
Sex: Female T Male T Trans T
Require:
Limits:
; Template: check if task is run in debug mode
; CAUTION: mode==1 checks if the task is run in debug mode or was started
from the pool. But use this with caution, this only works if you've started
the task via the 'Create or Edit a task' button and then clicked on 'Test'.
It does not work if you click on 'Run' or if you start it via the left hand
side menu from the message center.
;
if:(mode==1)
  show:this is the 'Test' mode
else:
  show:this is the live mode (or the 'Run' mode)
fi:
button:ok
;
```
