Title:assign tests
Sex: Female T Male T Trans T
Require:
Limits:
;This is just a quick test script for experimenting with the fancy new
assign feature. Thanks for adding it, Liz!!
;
;
assign:name1:2
assign:name2:1
assign:name3: name1 + name2
show: Hello, $name1. Also $name2! $name3
button: Neato! How about strings?
assign:name1:'testy1'
assign:name2:'testy2'
assign:name3: name1 + name2
show: Hello, $name1. Also $name2! By the way, here is both of those strings
combined with a plus sign! $name3
button: Neato! What if we subtracted strings, then?
assign:name1:'testy1'
assign:name2:'testy2'
assign:name3: name1 - name2
show: You get a NaN. See? $name3 . I just displayed name3 before this.
button: Okay. Can we use assign in if's?
assign:name1:599
assign:name2:2
assign:name3: name1 - name2
assign:name4: name1*name2
if:(name1 > name2)
    show: Yes! This is set to show if 'name1' is > 'name2.' $name1 , $name2.
Here's name3 by the way, subtracting name2 from name1. $name3. We can even
multiply! $name4
fi:
button: Huzzah! Now wait 2 seconds, using name2? $name2
wait: name2
show: Like that!
button: Yay! I'm done for now. Thank you so much for the great feature, Liz!
