Title:chastity_cleaning
Sex: Female T Male T Trans T
Require: chastity
Limits:
;Task to allow a slave to unlock, clean and re-lock while being observed
;
; *****
; NOTE TO TASK DEVELOPERS. It is strictly forbidden that you write other
tasks that read or modify variables from the users store, such as
chastityTagNumber.
; This is to prevent you from modifying your chastity status with test
tasks.
; NOTE that if you break this rule, and you are caught, your mood will drop
to zero and very likely you WILL BE EXPOSED
; You have been warned
; *****
;
; Variable table -
; TEMP1 == Type of locking mechanism. Values 1 through 5. Stored in
chastityLock persistent variable
; TEMP2 == number printed on one-time lock or tag. Loaded from
chastityTagNumber persistent variable
; TEMP3 == number printed on NEW one-time lock or tag. Stored in
chastityTagNumber
; TEMP4 == random control number to be shown on pictures
; TEMP5 == Time in seconds when chastity was started. Loaded from
chastityStartTime
; TEMP7 == unlock_pending flag from JIC server
; TEMP8 == click status used in loop to make random pictures until slave
clicks on continue
; TEMP1, TEMP2 and TEMP3 are also used in various places to load persistent
values
;
; Persistent variables -
; chastityLock == Type of locking mechanism. Values 1
through 5
; chastityTagNumber == Number printed on one-time lock or
tag
; chastityStartTime == Time in seconds when chastity was
started
; unlock_pending == Flag from JIC server that user
message board is blocked until this task has been called
;
; Local variables -
; lockType == Type of locking mechanism chosen by slave. Values
1 through 5
;
; ***** check if task is run with unlock_pending, i.e. at the wrong
time

;
; ***** Provide initial information to reviewers
image:taskimg/notForYou.PNG
log:IMPORTANT Slave is allowed to clean itself while being in chastity. For that the slave will unlock, clean itself, and relock, while random pictures are being take. It is essential that the slave and its genitals are on ALL pictures, and that there is NO evidence of the slave trying to orgasm. As a reviewer you are asked to help validating that the slave has been properly locked up, and is not cheating. Please do NOT hesitate to mark the task as FAILED if you have doubts. A mod will look at the situation in that case and decide what to do next. Chastity enforcement should be taken serious in JIC. Thank you for your help.
wait:1
