;----- Preparation -----
;
;intro
log:Task description. The slave will receive electrical stimulation while
kneeling, with electrodes attached either to his genitals or thighs.
;
image:taskimg/sets/runa/runa_black_chair_b66.jpg
show:Hello, it seems DTITLE DNAME has lent you out to me again. We're going
to have so much fun.
button:Yes Runa
show:Why are you still wearing clothes? You know you must be naked when
you're around me, SNAME.
```

```
button:Naked
show:Today, I want to shock you, so get your estim device.<br> Also, grab a
blindfold or something similar to cover your eyes, it's for a little
surprise at the end.
button:Got it Runa
show:First, you must attach the electrodes. Follow my instructions
carefully.
button:Yes Runa
;
;attaching electro
if:(INCHASTITY)
    ;slave is in chastity, electrodes positioned on the thighs
    show:I hope you didn't assume you'd be exempt from this task just because
you're currently in chastity. You guessed wrong.
    button:No Runa
    show:Place the electro pads on both sides of your thighs. This will create
the right shocks.
    button:Done
    log: The image below shows electrodes placed on each side of the slave's
thighs.
else:
    if:(HAS_PENIS)
        ;normal placing of the electrodes for males
        show: Place a set of electro loops around the penis, positioning one
just under the head and another at the base of the shaft or around the
testicles.
        button:Done
        log: The image below shows a set of electro loops positioned around the
penis, with one loop just beneath the head and another at the base of the
shaft or around the testicles.
    else:
        ;placing the electrodes for females
        show:Place the electro pads on both sides of your thighs. This will
create the right shocks.
        button:Done
        log: The image below shows electrodes placed on each side of the slave's
thighs.
    fi:
fi:
show:Move closer to the cam so I can capture a picture of the electros in
place.
button:Picture (10 seconds)
wait:10
cam:temp
;
;-----Calibrating -----
;Repeat until all sounds are prepared
;
show:Connect the electrodes to your estim device and activate it. It's time
to calibrate. Repeat the process until you can distinctly differentiate all
three shock levels.
```

```
button:Ok
;
while('$Calibrate' == 'yes')
  show:Which sound do you want to calibrate? Each calibration will give two
  shocks.
